EPSON INTRODUCES NEW CLASS OF MULTIFUNCTION PAYMENTS DEVICE FOR RDC
TM-S2000 Offers Multiple Features, Industry-Leading Functionality in One Compact Footprint

Boston, MA, November 6, 2011 – [Epson America, Inc.](http://www.epson.com), a leading supplier of value-added banking and payments solutions, today at the [Association for Financial Professionals Conference \(AFP\)](#) introduced its new [TM-S2000](#) multifunction payments device. Epson's new, feature-packed TM-S2000 offers industry-leading functionality, such as the fastest check scanning speed in its class, the highest MICR accuracy available and best-in-class image quality. Additional features include an optional 3-track magnetic stripe reader, a two-sided ID scanner, up to 15 lines of endorsement printing and an industry-leading two-year warranty. Epson's TM-S2000 delivers maximum functionality in an impressively small footprint and is ideally suited for high-volume RDC applications where speed, accuracy and maximum throughput are essential to workflow efficiency.

"The TM-S2000 delivers top of the line quality," commented Mike Helm, Director of Sales and Marketing, Epson Business Systems Division. "It's designed for businesses who need a robust RDC solution and also want to perform other customer service transactions without investing in additional hardware." Utilities, municipalities, check cashing stores and other businesses who accept walk-in check payments can reduce transaction time and speed customer service with the TM-S2000's combination of check capture and payment processing features.

Epson's TM-S2000 incorporates OCR-A and OCR-B font recognition, which is typically used on computer-generated invoices. When the customer's payment coupon is scanned, account information can be retrieved automatically, facilitating fast retrieval of customer account information.

Epson TM-S2000 Multifunction Payments Device

Human factors were critical to the TM-S2000 product design, resulting in an exceptionally compact footprint with recessed connectors, fewer covers and moving parts and self-diagnostics to minimize maintenance time and improve ease of operation.

Epson's TM-S2000 offers the following features in one small footprint:

- Fastest check processing speed in its class, up to 200 DPM
- Highest MICR accuracy in its class with enlarged MICR head to accurately read skewed checks
- 2-sided color scanning of IDs and payment coupons
- 15 lines of endorsement printing
- Optional 3-track magnetic stripe reader
- Industry-leading two-year limited warranty

Epson's TM-S2000 multifunction payments device will be available Q1 2012 through Epson's sales and distribution channels. For more information on Epson's full line of financial solutions, please visit pos.epson.com/financial.

About Epson America, Inc.

Epson is one of the world's leading manufacturers of highly reliable point-of-service technology, including printers, precision printing mechanisms and digital image scanners. Founded in 1975 and headquartered in Long Beach, CA, Epson America, Inc. is the U.S. affiliate of Japan-based Seiko Epson Corporation, a global manufacturer and supplier of high-quality technology products that meet customer demands for increased functionality, compactness, systems integration and energy efficiency. The Seiko Epson organization is proud of its ongoing contributions to the global environment, and for the third year in a row is part of the Dow Jones Sustainability World Index – an indicator for leading companies in economic, environmental and social criteria. Epson offers the most comprehensive line of POS printers, as well as the widest selection of ENERGY STAR qualified models available today.
