**METAVANTE CERTIFIES EPSON CHECK SCANNER FOR DIRECT BRANCH
DISTRIBUTED CAPTURE SOLUTION
Reliability and Two-Year Warranty to Benefit Financial and Commercial Institutions**

Las Vegas, NV, May 19, 2008 – Epson, a leading supplier of value-added banking and payment hardware solutions, today announced that Metavante Corporation, a provider of banking and payments technologies to over 8,000 financial services firms and businesses worldwide, has certified the Epson CaptureOne™ check scanner for its DirectBranch distributed capture software platform. In addition, Metavante is currently certifying CaptureOne for its DirectMerchant platform which enables merchants to clear checks directly at store locations without delivering checks to the bank for deposit.

Metavante certified CaptureOne as a result of customer demand for the Epson solution. “The Epson scanner underwent our rigorous quality assurance process to validate speed and image quality,” said Brian Hurdis, president, Metavante Image Solutions. “It’s critical that all Metavante-certified products deliver on the promise and CaptureOne met our high standards for reliability and quality.”

Metavante’s DirectBranch application offers the flexibility to capture payments and deposits at their source. CaptureOne enables customers to quickly perform two-sided scanning of checks and remittance coupons, streamlining workflow and reducing overall check processing costs. Incorporating one of the most powerful Magnetic Ink Character Recognition (MICR) algorithms in the industry, CaptureOne delivers the best MICR read rate of any desktop scanner available today for branch capture, back office and remote deposit capture applications.

“CaptureOne is a solid choice for financial institutions that want to offer their commercial customers the highest MICR accuracy available in a desktop check scanner,” said Bud Weist, vice president of sales and marketing, Epson System Device Group.

In 2007, Metavante also certified the Epson TM-J9000 scanner with integrated inkjet printer as a teller capture device for the Direct Branch platform.

CaptureOne Features and Benefits

Designed for back office branch capture and remote deposit capture applications, CaptureOne offers a 100-sheet document feeder in two versions, with scan rate options of 30 or 60 documents per minute (DPM). Other features include clear electronic endorsements for 100 percent legibility, a double check detector that virtually eliminates double-check feeding and a built-in franker that prints a static message on checks and payment coupons. In addition to being the only batch check scanner available with a two-year warranty, Epson provides overnight replacement options to minimize downtime.

TM-J9000 Features and Benefits

The TM-J9000 features TransScan™ two-sided check imaging, 25-check auto feeder, double check feed sensor, ProofPlus™ ID card scanner, drop-in validation and printing of logos and marketing messages, all in a small footprint.

About Metavante

Metavante Technologies, Inc. (NYSE:MV) is the parent company of Metavante Corporation. Metavante Corporation delivers banking and payments technologies to over 8,000 financial services firms and businesses worldwide. Metavante products and services drive account processing for deposit, loan and trust systems, image-based and conventional check processing, electronic funds transfer, consumer healthcare payments, electronic presentment and payment, business transformation services, and payment network solutions including the NYCE Network, a leading ATM/PIN debit network.
