**PROFITSTARS ADOPTS EPSON CHECK SCANNER FOR
REMITPLUS CHECK PROCESSING SOLUTION**

Las Vegas, NV, May 19, 2008 - Today Epson, a leading supplier of value-added branch banking solutions, announced that ProfitStars, a division of Jack Henry & Associates, Inc. (Nasdaq: JKHY) and provider of performance-improving solutions for financial institutions and diverse corporate entities, has certified the Epson CaptureOne™ desktop scanner as an integral component of its RemitPlus payment processing solution.

The CaptureOne desktop scanner provides ProfitStars' customers with an exceptionally reliable check capture device for back office capture and remote deposit capture applications. RemitPlus is an affordable check-posting system that provides a variety of businesses-including utilities, cities, government tax agencies, schools and churches-with the technology to capture check images and credit payments to individual accounts in a fully-automated environment, eliminating manual key entry. Additionally, RemitPlus has the ability to convert all paper checks into an Electronic Funds Transfer (EFT) and transmit through the secure Automated Clearing House (ACH) or Check 21 image exchange network.

"CaptureOne gives our RemitPlus customers an affordable and highly reliable desktop check scanner that virtually eliminates MICR misreads," said David Foss, general manager of ProfitStars. "And its two-pocket design offers flexibility when separating documents such as checks and payment coupons."

"RemitPlus software coupled with Epson's CaptureOne will allow ProfitStars to provide a more complete check electrification solution for its customers," said Bud Weist, vice president of sales and marketing, Epson System Device Group. "CaptureOne's high MICR read rate and reliability and RemitPlus' keyless automation make it a winning combination for businesses that accept walk-up or mail-in payments."

RemitPlus Features

RemitPlus is an automated electronic check processing solution that simplifies the remittance process by providing financial institutions and diverse corporate entities the ability to scan and capture images of checks and payment vouchers, stubs or coupons. This affordable, scalable check scanning and imaging solution is ideal for a large merchant to the smallest nonprofit organization as well as the largest lockbox providers. This solution's advanced character recognition (CAR/LAR) reads and stores the amount, endorses the checks, and saves the selected identifiers from the coupons. RemitPlus converts all paper checks into an electronic funds transfer (EFT) and transmits through the secure ACH or Check 21 image exchange network. This solution encompasses comprehensive search and archival abilities, allowing for user-friendly research. RemitPlus also saves financial institutions money by decreasing labor costs, reducing errors, eliminating courier costs, and mitigating fraud risk.

CaptureOne Features

Epson's compact CaptureOne scanner delivers highly reliable, cost effective check scanning by incorporating one of the most powerful Magnetic Ink Character Recognition (MICR) algorithms in the industry, delivering the best MICR read rate of any desktop scanner available today. Designed for back office branch capture and remote deposit capture applications, CaptureOne comes in both 30 and 60 documents-per-minute (DPM) versions and offers innovative features including electronic endorsement, built-in franker, double check detector to eliminate double check feeding, 100-check document feeder and industry-leading two year warranty.
