**EPSON EXPANDS FAMILY OF BRANCH BANKING SOLUTIONS**  
**WITH CAPTUREONE™ CHECK SCANNER**  
**Company Broadens Branch Check Processing and Printing Solutions**

**Las Vegas, NV, November 14, 2007** – Epson, a leading supplier of value-added branch banking solutions, today announced the expansion of its line of branch banking products with the addition of the CaptureOne desktop check scanner. CaptureOne incorporates RDM Corporation’s progressive Magnetic Ink Character Recognition (MICR) method, delivering the best MICR read rate of any desktop scanner available today for Back Office and Remote Deposit Capture applications. In addition, Epson’s TM-J9000 teller capture solution also provides reliable check processing for banks choosing to capture the check image at the point of presentment. The TM-J9000 is the only integrated teller device available today that provides check and ID scanning, validation and receipt printing all in a single compact footprint.

“Our goal is to provide the most reliable check capture solutions no matter where or how the bank chooses to process the check image,” said Bud Weist, vice president of sales and marketing, Epson System Device Group. “We will continue to leverage our expertise in electronic checks and multifunction printer design to deliver high-performing devices that combine multiple functions to improve teller workflow.” With the addition of Capture One, Epson now offers a “no risk” desktop scanner for financial institutions and their commercial customers that virtually ensures image quality and prevents double check feeding.

From standalone check scanners to advanced teller printers, Epson’s product offerings now meet a wide range of branch banking automation needs from printing of receipts and documents to check processing in compliance with Check 21 regulations. Epson’s family of banking printers include multifunction, thermal, impact and inkjet models to satisfy the full range of branch printing requirements. The multifunction TM-H6000III printer allows for high-speed receipt printing, drop-in validation for deposit slips, checks, cashier checks and batch tickets; QuickPass™ check processing (MICR reading, check printing and check endorsement all in one pass) and superior slip handling. Epson also provides a wide range of cost-effective thermal receipt printers,

impact printers for validation and cashier's checks, and inkjet printers for high-resolution transaction receipt printing.

**About Epson**

Epson is one of the world's leading manufacturers of highly reliable point-of-service technology, including printers, precision printing mechanisms and digital image scanners. For the second year in a row, Epson has been ranked first in POS peripherals in the *RIS News* 2007 Hardware Leaderboard and the *Vertical Systems Reseller* 2007 Hardware Leaderboard. Founded in 1975 and headquartered in Long Beach, CA, Epson America, Inc. is the U.S. affiliate of Japan-based Seiko Epson Corporation, a global manufacturer and supplier of high-quality technology products that meet customer demands for increased functionality, compactness, systems integration and energy efficiency.
