EPSON EXPANDS PAYMENTS PRODUCT LINE WITH GT-S80 SCANNER
High-Quality Page Scanner Ideal for Commercial Lockbox Applications

Los Angeles, CA, October 19, 2008 – [Epson](#), a leading supplier of value-added banking and payments solutions, today announced the introduction of the GT-S80, a high-quality page scanner designed to deliver the speed and reliability essential for commercial lockbox applications. The GT-S80 joins Epson's CaptureOne™ desktop check scanner to broaden Epson's family of industry-leading imaging products for the payments industry. The GT-S80 will be available December 1st through Epson's designated reseller channels.

“Epson has developed high-quality, award-winning commercial image scanners for over two decades,” said Bud Weist, vice president of sales and marketing, Epson System Device Group. “Banks and payments processors who provide commercial lockbox services will find the GT-S80 a solid, reliable choice for capturing the highest quality full-page remittance documents at a competitive price point.”

Features and Benefits

Epson's GT-S80 scans both sides of a document in just one pass and can easily handle multi-sized documents – from card size to 8.5 x 36 inches – allowing you to scan a stack of documents in its 75-page auto document feeder, at speeds up to 40 pages per minute. Other features include:

High-speed Scanning– 80 ipm (images per minute) @ 600 dpi

ReadyScan™ LED Technology - Unlike competitive scanners that use mercury-based CCSL (Cold Cathode Fluorescent Lamp) technology, Epson's GT-S80 uses a lower power, energy-efficient light source that enables immediate scanning, with no warm up time required.

Multi-Feed Detection – Ultrasonic sensor streamlines paper handling and detects double feeds to minimize error.

Imaging Technologies – The Epson scanner driver offers a host of innovative functions, including automatic paper size reduction, automatic hole punch removal, automatic de-skewing and automatic background color removal.

Job Customization – Easy-to-use interface provides job assignment and customization for scanning, saving, coping and attaching to e-mail in a variety of formats, including JPEG, PDF, BMP, TIFF or by EPSON Scan

Connectivity and Standards

For ultimate ease of setup and operation, the GT-S80 supports TWAIN and ISIS® interface standards. It also supports USB 2.0 and a variety of operating platforms, including Windows 2000 / XP / Vista and Mac OSX / Intel Mac.

About Epson

Epson is one of the world's leading manufacturers of highly reliable point-of-service technology, including printers, precision printing mechanisms and digital image scanners. For the third year in a row (2006-2008), retailers have ranked Epson first in POS peripherals in the *RIS News* "Hardware LeaderBoard." Founded in 1975 and headquartered in Long Beach, CA, Epson America, Inc. is the U.S. affiliate of Japan-based Seiko Epson Corporation, a global manufacturer and supplier of high-quality technology products that meet customer demands for increased functionality, compactness, systems integration and energy efficiency.
